

COOPER YANG

Game Designer | Technical Producer | 213-662-7535 | yangcooper@me.com | <https://cooperyang.com/>

EDUCATION

University of Southern California (GPA: 3.88)	Los Angeles
Game Design and Development, School of Cinematic Arts, Master of Science	September 2024-May 2026
New York University (GPA: 3.51)	New York City
Game Design, Tisch School of Art, Bachelor of Fine Arts	September 2018-May 2022
Departmental Honor	

EXPERIENCE

Masterworks Studios	Los Angeles
Technical Producer, Masterworks of Horror	May 2025-Present
- Built an autonomous AI coding agent that branches, implements, reviews, and opens pull requests, integrating 400+ PRs and 900+ AI-authored commits - Engineered the server-authoritative netcode and client-side prediction with rollback for a real-time 1v1 card game on Unity 6 and Netcode for GameObjects - Led the live backend migration from Unity Game Services to Microsoft Azure PlayFab behind a backend-agnostic hosting layer - Owned the multi-platform build pipeline as top contributor (~40% of commits), shipping to iOS and Windows and showing at GDC	
Tencent, NExT Studio	Shanghai, China
Combat Designer, SYNCED: Off-planet	August 2022-June 2024
- Designed and developed multiple PvE enemies, including 6 boss encounters and multiple common enemies, improving end-game engagement by 20% - Developed dungeon system framework for Season 1, introducing cooperative side quests with dynamic loot and objectives, and built 30 mini-dungeons using Unreal Engine Blueprints - Built level layouts and collaborated closely with Level Artists on dungeons and boss fight arenas, ensuring compelling player flow and cohesive aesthetics - Secured 7 patents with Tencent for innovative game mechanics designs	
Ape Squared Creative	Remote
Combat Designer, Above Land (Unannounced)	May 2025-September 2025
- Designed inaugural boss encounter with emphasis on cooperative gameplay dynamics and narratives, using Unreal Engine Blueprints and Gameplay Ability System (GAS). - Refined enemy designs to optimize animation workflows and support fast-paced and responsive melee combat mechanics.	
Giant Interactive Group, 2.5 Studio	Shanghai, China
Technical Art Intern, Battle of Balls	June 2019-August 2019
- Created a Unity editor tool that streamlines particle effect generation, reducing a 5-minute process to a single click - Designed customizable procedural-generated particles attached to player models, increasing immersion and customizability	

PROJECTS

VECTOR, Arena FPS	https://cooperyang.com/projects/vect0r
Level Designer & Game Designer	January 2025-July 2025
- Built the framework and netcode for a fast-paced 2v2 arena shooter with a customizable, evolving loadout system - Designed and iterated a PvP level emphasizing vertical movement, player speed, and competitive balance	
Epitaph Producer & Game Designer, Action Horror RPG	https://cooperyang.com/projects/epitaph-1997
Producer & Game Designer	September 2021-May 2022
- Produced the project and designed a spell-craft combat system that balances challenge with player agency - Built an audio framework and produced adaptive SFX for a horror environment to deepen immersion	

SKILLS

Software: Unity, Unreal Engine, Wwise, Pico 8, Maya, Reaper, PlayFab, Git
Programming: C++, C#, Java, Unreal Blueprint, Lua
Design & Production: Level & Combat Design, System Design, Multiplayer Netcode, Technical Production, Agile
